PROFILE

PROFESSIONAL SUMMARY

B.Sc. Computer Science graduate and multi-disciplinary STEM educator with strong proficiency in secondary Mathematics and Computing/ICT. Experienced in delivering Cambridge and inquiry-based curricula, integrating full-stack technical projects, and fostering analytical problem-solving skills across diverse student bodies.

EXPERIENCE

Computing Teacher
January 2025 – Present

Trillium International School · Addis Ababa

- Teach Cambridge IGCSE Computing and ICT for Years 9–13.
- Develop lessons, assessments, practical activities, and programming projects.
- Mentor students in programming, databases, web development, and computational thinking.
- Support student academic progress and project-based learning.

Cursor AI Hackathon Ethiopia – Developer / Participant
July 2026

Cursor · Addis Ababa

- Collaboratively built Mercado, an AI-powered system during the hackathon.
- Contributed to product development, problem-solving, and rapid prototyping.
- Applied AI-assisted development to turn an idea into a functional technology solution.

MERN Stack Developer Intern
May 2026 – June 2026

CodeAlpha · Remote

- Completed a practical MERN Stack development internship focused on building real-world web applications.
- Applied MongoDB, Express.js, React.js, Node.js, JavaScript, REST APIs, and Git in project-based tasks.
- Strengthened skills in full-stack development, responsive UI design, backend API development, database integration, and problem-solving.

Full Stack Developer Intern
March 2026 – April 2026

Future Interns · Remote

- Worked on practical development projects while strengthening skills in web development, programming, project implementation, and collaborative remote development.

Web Developer Intern
August 2025 – September 2025

Codveda Technologies · Remote

- Gained practical software development experience through project-based tasks, applying programming, web development, debugging, and problem-solving skills in a remote professional environment.

ICT Teacher
November 2024 – November 2025

Montessorian School · Addis Ababa

- Taught ICT and computer fundamentals to students.
- Developed practical lessons, exercises, and assessments.
- Introduced students to programming, digital literacy, and problem-solving.
- Built foundational experience in teaching, communication, classroom management, and technology education.

EDUCATION

B.Sc. Computer Science October 2019 – October 2024

Addis Ababa University · Addis Ababa

- Studied core areas of computer science including programming, databases, software engineering, web development, algorithms, and computer networks.
- Developed practical problem-solving and software development skills through academic projects and hands-on work.
- Built a strong foundation for pursuing careers in software engineering, full-stack development, and educational technology.

PROJECTS

Mercado — AI-Powered System

https://mercado-bice.vercel.app

- Built an AI-based system collaboratively during the Cursor AI Hackathon Ethiopia, applying rapid prototyping and AI-assisted development.

Signal — Real-Time Collaboration Platform | Developer

https://signal-solomon.netlify.app

- Built a real-time collaboration platform featuring multi-user video calling, screen sharing, live whiteboard, file sharing, and chat.
- Implemented WebRTC and Socket.io for real-time peer-to-peer communication, with JWT authentication, bcrypt password hashing, and AES-256-GCM encrypted chat.

Tasko — Daily Task Manager

https://sol-tasko.netlify.app

- Built a responsive task-management web application for creating, editing, categorizing, and tracking daily tasks and progress.
- Implemented task status management, categories, progress tracking, and task-clearing functionality.

Sol CRM — Customer Relationship Management System | Developer

https://sol-crm.netlify.app

- Built a web-based CRM application for organizing and managing customer/client information and interactions.
- Designed a practical interface focused on efficient client management and business workflow.

Sol Tutoring And Coding Academy | STCA

https://stca-academy.netlify.app

- Educational platform combining tutoring and coding education.

Sol Ethio Coder — Founder / Developer

https://sol-ethio-coder.netlify.app/

- Technology brand focused on software development, coding education, and technology content.

SKILLS

TypeScript · React · Node.js · CSS / Tailwind · JavaScript · HTML · Python · MongoDB · Git/GitHub · Netlify · Render · C++ · VS Code IDE

LANGUAGES

Amharic – Native **English** – Fluent

CERTIFICATIONS

Cursor AI Hackathon Ethiopia – Participant (2026)	Cursor
Web Development Internship (2025)	Codveda Technologies
Full Stack Development Internship (2026)	Future Interns
MERN Stack Development Internship (2026)	CodeAlpha
AI & Machine Learning Foundation (2024)	Atingi
Responsive Web Development (2022)	SoloLearn
Responsive UI Development (2023)	FreeCodeCamp
Programming Fundamentals (2024)	Ethio Coders Initiative
Data Science Fundamentals (2025)	Ethio Coders Initiative
AI Fundamentals (2025)	Ethio Coders Initiative

AWARDS

Cursor AI Hackathon Ethiopia — Participant / Developer
July 2026

- Built Mercado, an AI-based system, collaboratively during the hackathon.

Robotics Innovators Challenge — Participant / Developer
CJCR American Center

- Developed SHEBA, an autonomous robotics project focused on obstacle detection and avoidance.

Star Teacher of the Month
December 2025

Trillium International School (TIS)

- Recognized for outstanding teaching performance, student support, commitment to academic excellence, and positive contribution to the school community.

LEADERSHIP&ENTREPRENEURSHIP

Founder & Developer — Sol Tutoring & Coding Academy | STCA
October 2025 – Present

- Developing an education platform combining tutoring, coding education, and digital learning.

VOLUNTEERING

Basic Computer Skills Trainer
March 2023 – May 2023

Zewditu Orphanage Center

- Delivered basic computer skills training to students.
- Supported students with mathematics and learning activities.
- Created engaging, practical learning sessions.
